PROFESSIONAL SUMMARY

Entry-level Data Analyst with a B.E. in Computer Engineering and hands-on experience in **SQL, Python, Excel, and Power BI**. Delivered an end-to-end analytics project on **63K+ records across 5 datasets**: data cleaning, EDA, hypothesis testing, dashboards, and regression modelling. Skilled in KPI reporting, data visualization, and turning data into business insights. Completing the NIIT Professional Program in Data Analytics with GenAI.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL
BI & Reporting: Power BI (DAX, Power Query, Data Modeling), Microsoft Excel, Dashboards, KPI Reporting
Databases: MySQL (Joins, Aggregations, Subqueries, Stored Procedures, Triggers)
Analytics: Data Cleaning, EDA, Statistical Analysis, Hypothesis Testing, Correlation, Data Storytelling
ML: Data Preprocessing, Feature Selection, Linear Regression, Model Evaluation
Tools: Git, GitHub, Jupyter Notebook, Google Colab, Streamlit

PROJECTS

OTT Platform Business Analytics | *Python, SQL, Power BI, Statistics* GitHub

- Analyzed **63K+ records across 5 datasets** to evaluate content performance, viewer engagement, and customer retention.
- Cleaned data and ran EDA in Python and SQL; applied **4 statistical tests** (t-test, Z-test, Chi-square, Pearson correlation) to validate patterns.
- Built interactive **Power BI dashboards** with DAX measures and KPIs to support business reporting.
- Trained a Linear Regression model (SelectKBest features) predicting watch duration with **74.23% R^2**.

Fitness Tracker Management System | *MySQL* GitHub

- Designed a **normalized MySQL database** to store user profiles and fitness activity tracking data.
- Applied **4 core SQL techniques** (joins, aggregations, stored procedures, triggers) to automate analysis and reporting.

Rice Crop Disease Prediction | *Python, Deep Learning, U-Net* GitHub

- Preprocessed **multispectral crop images** to prepare clean inputs for training a deep learning model.
- Built a **U-Net segmentation model** to detect and localize disease-affected regions of rice crops.

AI-Powered Smart Task Tracker | *Python* GitHub

- Developed a Python application with **4 core features**: task tracking, reminders, file handling, and automated task organization.
- Improved personal productivity workflows by automating task sorting and deadline reminders.

EXPERIENCE

Data Science Virtual Intern **2025**
Prodigy Infotech *Virtual*

- Performed **data cleaning, EDA, and visualization** on real-world datasets using Python.
- Built predictive models and summarized findings into clear, actionable insights.

Machine Learning Virtual Intern **2025**
TalentBattle *Virtual*

- Applied ML algorithms in Python, including **data preprocessing, feature preparation, and model evaluation**.

EDUCATION

B.E. Computer Engineering **2026**
University of Mumbai *CGPA: 6.93/10*

CERTIFICATIONS & ACTIVITIES

- NIIT Professional Program in Data Analytics with GenAI (in progress)
- Deloitte – Data Analytics Job Simulation; Tata – Data Visualization Job Simulation (Forage)
- Python Training – Spoken Tutorial Project, IIT Bombay (Score: 77.43%)
- AI Applications Using Python Workshop – SSPM's College of Engineering, Kankavli
- **Training & Placement Coordinator:** organized technical events and placement activities
- Participant, Smart India Hackathon (SIH); NSS Volunteer
